New Rubik's Speed Cube (RSC)

Do you enjoy speedcubing? Are you a competitive speedcuber? Try the fastest speed cube available to achieve amazing solve times. We think you'll love it!

The best brains at Rubik's and Gan teamed up in 2016. Their mission? To develop the ultimate speed cube. Fast forward to July 2017... Rubik's Speed Cube is launched! It's superfast with a sleek look and smooth touch. Best of all, it turns at a racing pace under your complete control.

This is the fastest speed cube we've ever created. It emerged from the knowledge, expertise and spirit of two great speedcubing powerhouses: Rubik's and Gan. We think you'll agree – the result is a mind-blowing speed cube. Give it a go!

World-class speedcuber Kevin Gerhardt says:

"The key feature of this product is its feeling. I have never felt a cube that feels similar to the RSC... Unlike the older Rubik's cubes the RSC can actually keep up with the newest speedcubes. If you take your time and set it up properly the cube will turn almost flawlessly. If you like the feel it can actually replace your main."

Product Features

Ultra smooth, polished, anti-scratch surfaces

Top level corner cutting performance

Strong & stable core for faster solves

Strong Clip Design

The design & strength of the clips ensure your Rubik's Speed Cube resists impact & cracks

Colourful Clips

The colourful clips in the Rubik's Speed Cube look great and offer long-lasting performance

Seamless Design

Ultra smooth, anti-scratch surfaces mean that you don't need a cube-protect bag anymore

Anti-pop Design

No more pops in your competitions, thanks to the extra strong triple-cross-feet design

Strong Core

The Rubik's Speed Cube is made with Ganscores, so they are strong, stable & beautiful to turn

Lubricating Tracks

The lubricating tracks make your speed cube turn faster – and last longer

GES Elastic System

Fine-tune your Rubik's Speed Cube to exactly how you want it, thanks to its GES system

Frosted Surfaces

No more finger scratches! The cube's surface tiles have circular beads & quality polish
